OBJECTIVE

I am a Computer Science graduate with a strong foundation in Python, SQL, software development, REST APIs, and problem-solving. I am looking for an opportunity to apply my skills, contribute to building reliable and high-quality software applications, and continue growing in Front-End and Full-Stack Development.

EXPERIENCE

Meetmux — AIML Developer Intern **3 Months**

- Worked on the **PlaceMux Coding Evaluation module**, contributing to automated code evaluation and analysis.
- Improved model development workflows by applying Python-based data handling pipelines, strengthening real-time problem-solving skills across machine learning processes. - Developed and evaluated ML models on structured datasets, applying software design patterns to ensure clean, maintainable code
- Contributed to the development and testing of the **AI-powered coding evaluation pipeline** using Python and FastAPI.

SKILLS

Programming Languages: Python, SQL, JavaScript, java (basics)

Front-End: HTML5, CSS3, ReactJS, Responsive Web Design

Libraries: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn

Frameworks: TensorFlow, PyTorch

Back-End: Flask, FastAPI, REST APIs, API Development

Tools: Git, GitHub, VS Code, Antigravity , codex

PROJECTS

Sales Data Analysis Dashboard: Cleaned and analyzed sales datasets using Python, Excel, and SQL. Developed interactive Power BI dashboards to identify sales trends, KPIs, and generate accurate business insights.

Fake News Detection Using Machine Learning and NLP: Developed a Fake News Detection system using Python, Machine Learning, and NLP to classify news articles as real or fake. Applied text preprocessing and TF-IDF vectorization, and deployed the project using Streamlit. Documented test execution results.

URL-Shortener Application: Developed a simple and user-friendly URL Shortener application using Python, Tkinter, and the PyShorteners library. The application allows users to enter long URLs and quickly generate shortened links through an easy-to-use graphical interface. This project helped me gain hands-on experience in Python GUI development, user input handling, and integrating external Python libraries into a functional application

INTERNSHIPS

Meetmux| AIML Developer Intern: AICTE| Google virtual AIML Internship : Improved model development workflows by applying Python-based data handling pipelines, strengthening real-time problem-solving skills across machine learning processes. - Developed and evaluated ML models on structured datasets, applying software design patterns to ensure clean, maintainable code

EDUCATION

B.Tech in CSE : QIS College of Engineering and Technology,Ongole **2022 - 2026**
CGPA: 8.3/10 AP, India

CERTIFICATIONS

Python Programming-Codetantra : Completed a Python course through Codetantra,covering core concepts and hands-on coding practice with real-world problem-solving.

Web Development -Hunar Intern: Certified in Frontend Development from Hunar Intern, with experience in creating responsive web interfaces using HTML, CSS to enhance design and user experience.
